Nova Scotia

ANNUAL REPORT

Service Nova Scotia
and Municipal Relations

Vital Statistics

His Honour Brigadier-General The Honourable
J.J. Grant, CMM, ONS, CD (Ret'd)
Lieutenant Governor
Province of Nova Scotia

Your Honour :

I have the pleasure of presenting the Report of the Registrar General containing the Vital Statistics of the Province for the year ending December 31, 2009.

Mark Furey
Registrar General

To The Honourable Mark Furey
Registrar General
Province of Nova Scotia

Sir :

It is my privilege to present to you the Report of the Deputy Registrar General containing the Vital Statistics of the Province for the year ending December 31, 2009.

Michelle MacFarlane
Deputy Registrar General

Part I
Introduction and Highlights of Statistics

Introduction

The 2009 Annual Report of births, deaths, stillbirths, marriages and domestic partnerships is compiled by the Vital Statistics Unit of Service Nova Scotia and Municipal Relations. Data on vital events occurring in Nova Scotia has been published since 1917. The information presented in the following charts and tables is based upon data collected on vital event registrations.

The *Vital Statistics Act* (Chapter 494 of the Revised Statutes of Nova Scotia, 1989) requires that all births, deaths, stillbirths, and marriages in the province be registered with the Vital Statistics Office.

Vital Statistics is also responsible for the administration of the *Solemnization of Marriage and Change of Name Acts* of Nova Scotia.

The provincial registration system serves two primary functions:

1. to obtain and preserve the documentary evidence necessary to provide individuals with official proof of the facts concerning a birth, death, stillbirth, or marriage; and

2. to provide information and statistics to health professionals and planners for public health surveillance, health education and promotion, epidemiological research, and health planning.

Vital Event Data

This report summarizes information on vital events that occurred in the province to Nova Scotia residents. It excludes events to non-residents except where specifically noted. Statistics relating to Nova Scotia residents who gave birth, were married or died outside the province are also excluded. Marriage statistics summarize all events that occurred in the province to either residents or non-residents.

To maintain confidentiality, identifying information for individuals is not disclosed. At the national level, Nova Scotia Vital Statistics, along with all other Canadian provinces and territories, shares data with Statistics Canada for further compilation, analysis, reporting and comparison. Information on vital events that occur to Canadians outside their province of usual residence is made available through their publications.

Time Periods

This report covers events occurring in the calendar year 2009. Selected tables present aggregate data across a number of years.

Population Data

Population estimates were adapted from Nova Scotia Community Counts web page - Data modeled from Statistics Canada http://www.gov.ns.ca/finance/communitycounts/

Medical Coding

Medical Certificates of Death and Stillbirth provide information on the immediate cause of death or stillbirth, antecedent causes giving rise to the immediate cause, and other significant conditions contributing to the death or stillbirth. The World Health Organization's International Classification

of Diseases (ICD) coding scheme is used to assign the appropriate medical codes. This information is processed by Statistics Canada in Ottawa, using microfilmed images of Registrations.

Since the early 1900's, the International Classification of Diseases has been revised regularly in order to reflect advances in medical science and changes in diagnostic terminology. The ninth revision of ICD (ICD-9) was used for medical coding until 1999. Coding according to the tenth revision of ICD (ICD-10) was implemented nationally as of January 1, 2000.

Acknowledgments

Vital Statistics would like to acknowledge and thank the many groups and individuals who ensure complete and accurate recording of vital events, including our division registrars of births, deaths and stillbirths located in hospitals and funeral homes, deputy issuers of marriage licenses, physicians who certify causes of death and stillbirth and the Provincial Medical Examiner's office at the Department of Justice. Vital Statistics also wishes to thank and acknowledge Yuko Henden, Research and Statistical Officer for Vital Statistics, for her contribution as the primary author of this report.

Other Information and Contact Information

More information on the Vital Statistics Unit of Service Nova Scotia and Municipal Relations is available on our website at http://www.gov.ns.ca/snsmr/vstat/. Previous years' Annual Reports, back to, and including 2002, may be accessed online.

Summary of Operating Statistics

Vital Statistics is mandated to provide the public with services relating to vital events that occur in Nova Scotia, in accordance with the *Vital Statistics Act*. To meet this mandate, the office is responsible for maintaining the provincial registry for births, marriages, domestic partnerships, deaths, and stillbirths and for issuing certificates for these events. The registry maintains data that assist in the decision-making process for health planning and monitoring, policy formulation and comparisons with other jurisdictions across time, and for preparing statistics for the public for business planning, trend analysis, etc. Additional services, provided under the *Solemnization of Marriage Act* and the *Change of Name Act* include: registration of clergy and civil marriage officiants, issuance of marriage licenses, and registering legal changes of name.

Services provided, Vital Statistics 2009:

SERVICES	TOTAL NO:
BIRTH, DEATH, AND MARRIAGE CERTIFICATES ISSUED	41,370
BIRTHS, DEATHS, MARRIAGES, AND STILLBIRTHS REGISTERED	21,607
CHANGES OF NAME PROCESSED	346
MARRIAGE LICENSES SOLD	4,863
INFORMATION SERVICES PROVIDED (PHONE AND EMAIL)	20,237
AMENDMENTS PROCESSED (INCLUDING DELAYED REGISTRATIONS AND ADOPTIONS)	2,251
TOTAL SERVICES	90,674

On a Typical Day in Nova Scotia in 2009

24 LIVE BIRTHS OCCURRED IN THE PROVINCE TO NOVA SCOTIA RESIDENTS:

12 males and 12 females
6 babies were born every 4 days to teenage mothers
11 were born to parents not married to each other
2 live births were registered with no father named
7 low birth weight babies were born every 5 days (< 2,500 grams)
2 multiple births occurred every 5 days
1 stillbirth occurred every 6 days

22 DEATHS OCCURRED IN THE PROVINCE TO NOVA SCOTIA RESIDENTS:

11 males and 11 females
7 deaths were due to diseases of the circulatory system including:
4 - from heart diseases
1 - from cerebrovascular disease
7 deaths were due to cancer including:
2 - from lung cancer
2 deaths were due to diseases of the respiratory system
8 deaths every 5 days resulted from accident or violence
3 deaths every 5 days were due to diabetes
3 deaths every 4 days were due to Alzheimer's disease
1 death occurred every 73 days due to AIDS/HIV infections
1 infant death occurred every 12 days

13 MARRIAGES WERE SOLEMNIZED IN NOVA SCOTIA:

6 were civil ceremonies and 7 were performed by religious representatives
8 marriages were to couples where both parties were marrying for the first time
1 marriage every 61 days was to a couple where both parties were teenagers

1 DOMESTIC PARTNERSHIP DECLARATION WAS FILED EVERY 8 DAYS

Summary of Vital Events

Since 1952, the population of Nova Scotia has increased by approximately 44%. Demographic and social changes have had a dramatic impact on vital events. The birth rate has fallen to about half the rate seen in the 1960's, yet mortality rates have remained more or less static. The net result, in 2009, is a 'natural increase rate' of only 0.8, as the number of deaths approach the number of births each year. Emigration and immigration are not included in natural population growth rates.

- In 2009, there were 8,896 live births in Nova Scotia to NS residents. The number of live births decreased by 235 births from 9,131 births in 2008. The birth rate was 9.5 births per 1,000 population.
- There were 8,174 deaths of Nova Scotia residents in 2009, up 7 deaths from the previous year. The death rate was 8.7 deaths per 1,000 population. The leading causes of death in Nova Scotia were cancer and the diseases of the circulatory system; in 2009, deaths from these causes made up 59% of all deaths.
- A total of 4,632 marriages were solemnized in Nova Scotia in 2009. The marriage rate per 1,000 populations was 4.9, unchanged from the previous year. Marriage statistics include all marriages that took place in the province, including those where one or both parties were non-Nova Scotia residents.
- During 2009, there were 85 same-sex marriages solemnized in the province. Thirty-seven of those marriages were of male couples, and 48 were of female couples.
- There were 59 stillbirths to residents of Nova Scotia in 2009. The stillbirth rate was 6.6 per 1,000 total births (live births and stillbirths).
- In 2009, there were 31 infant deaths (age at death less than one year) in the province, for an infant mortality rate of 3.5 per 1,000 live births. Of these 31 infant deaths, 23 were neonatal deaths, occurring to infants under 28 days of age. The infant death rate in the past five years has ranged from 3.3 to 4.4.

Table I

Population* of Nova Scotia, 1952 – 2009

The population of the province in the following table is given for reference purposes and comparison for the period 1952-2009

YEAR	POPULATION		YEAR	POPULATION
1952	653,000		1981	855,000

Part II
Detailed Summaries and Tables

Summary of Birth Statistics

- In 2009, there were 8,896 births to residents of Nova Scotia, of which 51.8% were males (4,611) and 48.2% were females (4,285).
- There were 150 births in Nova Scotia to non-residents of the province.
- The vast majority of births – 99.5% – occurred in hospital.
- Halifax, Hants and Yarmouth counties experienced the highest birth rate per 1,000 population at 10.5, 10.2 and 10.2 respectively.
- Richmond and Guysborough counties experienced the lowest birth rate per 1,000 population at 6.4 and 5.5 respectively.
- The 5 most populated counties together had 6,467 births or 72.7% of all the births in Nova Scotia. Births in Halifax accounted for 46.8% of the total births in the province for 2009.
- The provincial birth rate for 2009 was 9.5 births per 1,000 population. This compares to the Canadian national birthrate of 11.3 for 2008, the last reported year.
- Only 5.8 % of babies born in Nova Scotia in 2009 had a birth weight under 2,500 grams.
- In 2009, there were 4 births to women under the age of 15, and 547 births to women aged 15-19, for a total of 551 births to teenage mothers. This represents 6.2% of all live births for 2009. There were 187 births to teenaged fathers (aged 19 or younger), or 2.1% of live births.
- Of the 551 births to teenaged mothers, 146 were to fathers who were also 19 years of age or younger. This means 1.6% of live births in 2009 were to parents who were both teenagers.
- In 2009, 47.7% of live births were to women aged 20-29, 43.5% of live births were to women aged 30-39, and 2.5% were to women aged 40 or older. The median age of women who gave birth in 2009 was 28 years, while for first-time mothers in Nova Scotia the median age was 27 years.
- There were 139 births to parents who were both 40 years of age or older. This represents 1.6% of live births. The oldest mother was 46 years of age and the oldest father was 63.
- There were a total of 147 multiple births in Nova Scotia in 2009 -146 twin births and one triplet birth.

Another Way to Present Birth Information

Of every 100 live births in Nova Scotia in 2009, approximately

- *6 were to teenaged mothers aged 19 or under (551)*
- *48 were to mothers aged 20-29 (4,244)*
- *43 were to mothers aged 30-39 (3,869)*
- *2 were to mothers aged 40-49 (218)*
- *2 were to a teenaged father aged 19 or under (187)*
- *33 were to fathers aged 20-29 (2,924)*
- *47 were to fathers aged 30-39 (4,216)*
- *9 were to fathers aged 40-49 (762)*
- *<1 was to a father aged 50-59 (60)*
- *<1 was to a father aged 60 and over (7)*
- *8 were to fathers whose age was not stated (740)*

Summary of Death Statistics

- In 2009, there were 8,174 deaths to residents of Nova Scotia, of which 50.0% were males (4,087) and 50.0% were females (4,087).
- Queens and Digby counties experienced the highest death rate per 1,000 at 13.3 and 12.5 respectively.
- Halifax and Kings counties experienced the lowest death rates per 1,000 population at 6.7 and 7.9 respectively.
- The provincial death rate for 2009 was 8.7 deaths per 1,000 population.
- There were 2,376 deaths due to diseases of the circulatory system in Nova Scotia, which is 29.1% of all deaths. Of these:
  - 688 were due to chronic ischemic heart disease – 8.4% of all deaths.
  - 452 were due to acute myocardial infarction (heart attack) – 5.5% of all deaths.
  - 508 were due to cerebrovascular disease, including stroke – 6.2% of all deaths.
- There were 2,455 deaths due to malignant neoplasms (cancer) in Nova Scotia, 30% of all deaths. The greatest number of cancer deaths were due to cancer of the trachea, bronchus, and lung (654 deaths), colon cancer (185 deaths), and other malignant neoplasms of other and unspecified sites (184 deaths).
- There were 453 deaths due to chronic lung diseases (excluding asthma), 5.5% of all deaths.
- There were 317 deaths due to diseases of the digestive system, including liver disease – 3.9% of all deaths.
- There were 446 deaths due to accidents and unintentional injury –5.5% of all deaths.
- There were 220 deaths due to diabetes – 2.7% of all deaths.
- There were 181 deaths due to influenza (8) and pneumonia (173) – 2.2% of all deaths.
- There were 130 deaths due to intentional self-harm (suicide).
- Nova Scotians are most likely to die in hospital:
  - 4,792 died in hospital
  - 1,629 died at home
  - 1,508 died in another healthcare facility (i.e. nursing home)
  - 243 died at another locale
  - 2 had unknown place of death
- 49.0% of those who died during 2009 were aged 80 years or over.

* Prior to 1950, total of Class VII, Diseases of the Circulatory System, with the addition of No. 58, Acute Rheumatic Fever, was taken from Class III. From 1950 onward, Class VIII includes Acute Rheumatic Fever.

Summary of Stillbirth, Maternal Death and Infant Death Statistics

- Stillbirths are defined as delivery of a fetus that is 500+ grams in weight or 20+ weeks in gestation and where there is no breathing, beating of the heart, pulsation of the umbilical cord or unmistakable movement of voluntary muscle.
- In 2009, there were 59 stillbirths to mothers who were residents of Nova Scotia, which is a rate of 6.6 per 1,000 live births. The Canadian national rate for stillbirths in 2008 (the last reported year) was 7.3 per 1,000 live births.[1]
- In 2009, there were 31 infant deaths (death occurring to a child under 1 year of age) in the province, for an infant mortality rate of 3.5 per 1,000 live births. Of these 31 infant deaths, 23 were neonatal deaths, occurring to infants under 28 days of age. The infant death rate in the past five years has ranged from 3.3 to 4.4. The Canadian national infant death rate for 2008 (the last reported year) was 5.1 per 1,000 live births.[2] Nova Scotia has been consistently at or below the national infant death rate.
- The leading category of causes of infant death in Canada is Certain Conditions Originating in the Perinatal Period[3] which includes conditions which have their origin in the perinatal period (before and during labour) even though death (or morbidity) occurs later.[4] This is also the leading cause of infant death in Nova Scotia. There were 19 deaths in this category. For specific causes of death in this category, please see Table XV.
- There were 7 infant deaths attributable to congenital malformations, deformations, or chromosomal abnormalities.

* *Medical Examiner cases with unresolved cause of death at time of printing*

There were no reported deaths in the following:

II. Neoplasms
V. Mental and behavioral disorders
VII. Diseases of the eye and adnexa
VIII. Diseases of the ear and mastoid consequences of external causes
XI. Diseases of the digestive system
XII. Diseases of the skin and subcutaneous tissue
XIII. Diseases of the musculoskeletal system process system and connective tissue
XIV. Diseases of the genitourinary system
XIX. Injury, poisoning and certain other
XXI. Factors influencing health status and contact with health services

Summary of Marriage and Domestic Partnership Statistics

- In 2009, 4,632 marriages took place in Nova Scotia. This includes all marriages that occurred in the province, including those of non-residents.
- Of those 4,632 marriages:
  - 4,547 were opposite sex couples.
  - 48 were same sex female couples.
  - 37 were same sex male couples.
- The median age for first marriage in 2009 was 29 years. 3,495 single women and 3,401 single men tied the knot in 2009.
- The median age of those marrying for the 2nd or subsequent times was 48 years. For 1,148 women and 1,220 men marrying in 2009 was not a first time experience.
- 2,630 marriages in 2009 were solemnized by a clergy member, while 2,002 were civil ceremonies.
- Summer was the most popular time for a wedding: August was the most popular month, with 1,143 weddings, followed by July (812) and September (648).
- 57 romantic couples were wed on Valentine's Day - February 14.
- Most weddings in a day occurred on 22nd August 2009 - 204 couples were wed on that day.
- 46 domestic partnerships were registered with Vital Statistics in 2009.
- The majority of couples registering their domestic partnerships in 2009 were opposite sex couples, with same sex couples representing 19.6% of partnerships registered.
- 54.3% of partners had never been married previous to registering their partnership.
